

## FABRIC REQUIREMENTS:

- To be determined

## Group Project: Star in a Star

So, here we go again...we have the center of the quilt. It measures 48"x48". We need to turn it into a rectangle and make it big enough for a queen size bed.

By the way, this is made with a single 12" x 12" block.. Instructions will be posted when the project is finished.

We could simply add squares and put a couple of borders on it. Or we could add a simple pieced border, like the suggestion on the right. What do you think? Tell us your idea in the app or email [projects@quilterstthread.com](mailto:projects@quilterstthread.com).
